

We thank you for your time spent taking this survey.
Your response has been recorded.

TPACK (Technological Pedagogical Content Knowledge)

is a framework that describes the knowledge that teachers need to effectively integrate technology into their teaching.

The survey below will ask you a series of questions to assess your current TPACK at the start of this class. We ALL have different TPACK levels--that's natural! Just give your honest best estimates for right now.

Tell us who you are!

Put your name in the box below with the format: last name (family name), first name. For Dr. Sadler this would be Sadler, Randall. For Dr. Dooly this would be Dooly, Melinda.

Muset Domínguez, Laia

Section I: General Technological Knowledge (TK)

These question ask about your Confidence Level with innovative tools and their relevance to language learning. For each question simply rank your level of confidence in your ability to...:

- Not at all confident
- A little confident
- Somewhat confident
- Mostly confident
- Fully confidently

adapt general basic tools like (Google Docs, Canva, WordWall) for language learning tasks.

Fully Confident

use LMS platforms (e.g., Moodle, Canvas, Google Classroom) to support classroom management.

Fully Confident

find and select appropriate mobile apps or websites that enhance language learning (reading, writing, pronunciation, comprehension, speaking, etc.).

Fully Confident

assess the accessibility and usability of technology for my students.

Fully Confident

use technology to help students collaborate with peers in other countries.

Fully Confident

troubleshoot common tech problems during class without losing momentum.

Mostly confident

manage when faced with connectivity issues.

Mostly confident

design language assessment related to tech tool use.

Fully Confident

confidently explore unfamiliar digital tools to enhance language teaching.

Section II: Knowledge on Specific Technology Domains related to our Course.

For each of the topics below, again rate your confidence level from Not at all to Fully confident.

1. Hyperlinked Resources (HLR)

create teaching materials with embedded hyperlinks (in documents, images and videos).	▼
Fully confident	
provide clear navigation cues in hyperlinked teaching materials, with appropriate language level (mapping and content so students don't get lost).	▼
Mostly confident	
design tasks that meaningfully integrate embedded hyperlinked resources, with specific language output.	▼
Fully confident	
create appropriate scaffolding materials (e.g. instructions, explanations) for minimal teacher intervention during the use of HLR.	▼
Fully confident	
create non-HLR versions of activities or summaries for students who can't access the technology.	▼
Mostly confident	

2. Augmented Reality:

For each of the topics below, again rate your confidence level from Not at all to Fully confident.

find and select appropriate AR content that enhances language learning.	▼
Mostly confident	
connect AR experiences to concrete language learning goals.	▼
Fully confident	
design meaningful AR tasks that promote purposeful language use (and are not just 'gimmicks').	▼
Fully confident	
create non-AR versions of activities or summaries for students who can't access the technology.	▼
Mostly confident	
create simple instructions and reflections for AR tasks (pre & post-tasks) that avoid language overload (too dense or too high levels of the target language).	▼
Fully confident	

3. High, Mid, and Low Immersive Virtual Reality (VR):

For each of the topics below, again rate your confidence level from Not at all to Fully confident.

design low immersive VR activities that go beyond passive activity (e.g., watching a 360° video without structured output).	▼
Mostly confident	
combine VR with offline or asynchronous pre-/post-tasks for maximum language learning impact.	▼
Fully confident	
optimize already existing language learning VR apps (e.g Mondly VR, Immerse, Engage) for lessons.	▼
Mostly confident	
provide clear goals, language prompts, and safety instructions before sending learners to immersive spaces.	▼
Fully confident	
manage classroom activities in which some students are in VR while others are doing non-VR activities.	▼
Mostly confident	

Section III: Content Knowledge on language teaching and learning

Rate your ability for each of the descriptors below, ranging from:

- I cannot do this at all
- I can do this in a limited way
- I can do this adequately
- I can do this well
- I have mastered it

use efficiently (read, write, listen, speak, interact) the target language.

I have mastered it

clearly explain grammar structures and patterns in the target language.

I have mastered it

describe how Vygotsky's sociocultural theory applies to language learning.

I can do this well

can connect (socio)constructivist principles to task-based & project-based language teaching.

I can do this well

apply principles of (post) and communicative language teaching that align with SLA research.

I can do this well

identify and explain how language learning theories influence my teaching decisions.

I can do this well

adapt different language learning theories to lesson planning.

I can do this well

adapt CEFR or other frameworks for language assessment.

I have mastered it

apply intercultural communicative competence (ICC) in my own life and in my teaching.

I can do this well

select comprehensible input and provide examples in practice.

Section IV: Pedagogical Knowledge:

Rate your ability for each of the descriptors below, again ranging from: I cannot do this at all to I have mastered it.

provide corrective feedback (personal or with digital tools) in language development. I have mastered it	▼
scaffold content for different levels of students. I have mastered it	▼
create activities that interconnect different skills (listening, speaking, reading, writing). I have mastered it	▼
link language learning to global issues or learners' real-world interests. I have mastered it	▼
design telecollaborative language learning projects. I have mastered it	▼
design pair and group work effectively to promote interaction. I have mastered it	▼
create scaffolding for off-task moments (instructions, transitions, etc.) I have mastered it	▼
design tasks that encourage spontaneous and meaningful target language use (and support risk-taking in target language). I have mastered it	▼
design formative assessment tools that guide students' learning. I can do this well	▼
create materials and lessons that foster motivation in language learners. I have mastered it	▼
